VOC Emissions from Wastewater Treatment Plants: Characterization, Control and Compliance

VOC Emissions from Wastewater Treatment Plants: Characterization, Control, and Compliance provides comprehensive information on the subject of Volatile Organic Compound (VOC) emissions from publicly owned treatment works (POTWs). It describes models of emission factors so that readers will know what to expect when models need to be used for the estimation of VOCs from their specific wastewaters. The authors provide a road-map approach for air pollution abatement compliance so that managers can determine their human resource needs. POTW professionals will find information on VOC emissions from various unit processes such as sewers, preliminary and secondary clarifiers, activated sludge and attached growth systems, sludge treatment, and combustion devices.
