Programming the Mobile Web

Maximiliano Firtman

Programming the Mobile Web Maximiliano Firtman

With the second edition of this popular book, you'll learn how to build HTML5 and CSS3-based apps that access geolocation, accelerometer, multi-touch screens, offline storage, and other features in today's smartphones, tablets, and feature phones. The market for mobile apps continues to evolve at a breakneck pace, and this book is the most complete reference available for the mobile web.

Author and mobile development expert Maximiliano Firtman shows you how to develop a standard app core that you can extend to work with specific devices. This updated edition covers many recent advances in mobile development, including responsive web design techniques, offline storage, mobile design patterns, and new mobile browsers, platforms, and hardware APIs.

- Learn the particulars and pitfalls of building mobile websites and apps with HTML5, CSS, JavaScript and responsive techniques
- Create effective user interfaces for touch devices and different resolution displays
- Understand variations among iOS, Android, Windows Phone, BlackBerry, Firefox OS, and other mobile platforms
- Bypass the browser to create native web apps, ebooks, and PhoneGap applications
- Build apps for browsers and online retailers such as the App Store, Google Play Store, Windows Store, and App World

From reader reviews:

Michael Brown:

This Programming the Mobile Web book is just not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is usually information inside this book incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This specific Programming the Mobile Web without we understand teach the one who reading it become critical in contemplating and analyzing. Don't always be worry Programming the Mobile Web can bring once you are and not make your tote space or bookshelves' turn out to be full because you can have it in the lovely laptop even cellphone. This Programming the Mobile Web having very good arrangement in word as well as layout, so you will not really feel uninterested in reading.

Richard Linneman:

Programming the Mobile Web can be one of your beginning books that are good idea. We all recommend that straight away because this e-book has good vocabulary that could increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort to place every word into pleasure arrangement in writing Programming the Mobile Web but doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource facts that maybe you can be certainly one of it. This great information can certainly drawn you into brand-new stage of crucial pondering.

Stacey Williams:

This Programming the Mobile Web is great publication for you because the content which can be full of information for you who have always deal with world and possess to make decision every minute. This particular book reveal it information accurately using great arrange word or we can state no rambling sentences within it. So if you are read the idea hurriedly you can have whole facts in it. Doesn't mean it only gives you straight forward sentences but tricky core information with attractive delivering sentences. Having Programming the Mobile Web in your hand like having the world in your arm, details in it is not ridiculous just one. We can say that no book that offer you world in ten or fifteen minute right but this e-book already do that. So , this can be good reading book. Hi Mr. and Mrs. hectic do you still doubt which?

Deanna Reed:

What is your hobby? Have you heard that will question when you got college students? We believe that that query was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person similar to reading or as examining become their hobby. You have to know that reading is very important and book as to be the factor. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you decide to try be your object. One of them is actually Programming the Mobile Web.
