Three-Dimensional Television (Signals and Communication Technology) H.M. Ozaktas, Levent Onural
Advances in optical technology and computing power are bringing life-like 3DTV closer, with potential applications not only in entertainment, but also in education, scientific research, industry, medicine, and many other areas. 3DTV will require the integration of a diversity of key technologies from computing to graphics, imaging to display, and signal processing to communications. The scope of this book reflects this diversity: different chapters deal with different stages of an end-to-end 3DTV system such as capture, representation, coding, transmission, and display. Both autostereoscopic techniques which eliminate the need for special glasses and allow viewer movement, and holographic approaches which have the potential to provide the truest three-dimensional images, are covered. Some chapters discuss current research trends in 3DTV technology, while others address underlying topics. This book is essential to those with an interest in 3DTV-related research or applications, and also of interest to those who, while not directly working on 3DTV, work in areas which developments in 3DTV may touch, such as multimedia, computer games, virtual reality, medical imaging, and scientific simulation.

From reader reviews:

Grace Seals:

What do you in relation to book? It is not important along with you? Or just adding material when you require something to explain what your own problem? How about your time? Or are you busy man? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have spare time? What did you do? Everyone has many questions above. They must answer that question due to the fact just their can do that will. It said that about guide. Book is familiar on every person. Yes, it is appropriate. Because start from on pre-school until university need that Three-Dimensional Television (Signals and Communication Technology) to read.

James Barclay:

In this 21st one hundred year, people become competitive in every way. By being competitive currently, people have do something to make these people survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yeah, by reading a guide your ability to survive raise then having chance to remain than other is high. To suit your needs who want to start reading a book, we give you this particular Three-Dimensional Television (Signals and Communication Technology) book as starter and daily reading book. Why, because this book is greater than just a book.

Robert Defazio:

Do you like reading a guide? Confuse to looking for your best book? Or your book seemed to be rare? Why so many question for the book? But just about any people feel that they enjoy with regard to reading. Some people likes reading, not only science book and also novel and Three-Dimensional Television (Signals and Communication Technology) as well as others sources were given expertise for you. After you know how the truly great a book, you feel wish to read more and more. Science e-book was created for teacher or even students especially. Those books are helping them to bring their knowledge. In other case, beside science e-book, any other book likes Three-Dimensional Television (Signals and Communication Technology) to make your spare time far more colorful. Many types of book like this one.

William Levitt:

A number of people said that they feel bored stiff when they reading a guide. They are directly felt the idea when they get a half areas of the book. You can choose often the book Three-Dimensional Television (Signals and Communication Technology) to make your personal reading is interesting. Your current skill of reading ability is developing when you such as reading. Try to choose very simple book to make you enjoy to read it and mingle the idea about book and looking at especially. It is to be initial opinion for you to like to open up a book and read it. Beside that the publication Three-Dimensional Television (Signals and Communication Technology) can to be your new friend when you're feel alone and confuse in what must

you're doing of these time.
