The Kruger Experience: Ecology And Management Of Savanna Heterogeneity Harry C. Biggs

Kruger National Park in South Africa has one of the most extensive sets of records of any protected area in the world, and throughout its history has supported connections between science and management. In recognition of that long-standing tradition comes *The Kruger Experience*, the first book to synthesize/summarize a century of ecological research and management in two million hectares of African savanna.

The Kruger Experience places the scientific and management experience in Kruger within the framework of modern ecological theory and its practical applications. The book uses a cross-cutting theme of ecological heterogeneity -- the idea that ecological systems function across a full hierarchy of physical and biological components, processes, and scales, in a dynamic space-time mosaic. Contributors, who include many esteemed ecologists who have worked in Kruger in recent years, examine a range of topics covering broad taxonomic groupings and ecological processes. The book's four sections explore:

- the historical context of research and management in Kruger, the theme of heterogeneity, and the current philosophy in Kruger for linking science with management
- the template of natural components and processes, as influenced by management, that determine the present state of the Kruger ecosystem
- how species interact within the ecosystem to generate further heterogeneity across space and time
- humans as key components of savanna ecosystems

In addition to the editors, contributors include William J. Bond, Jane Lubchenco, David Mabunda, Michael G.L. ("Gus") Mills, Robert J. Naiman, Norman Owen-Smith, Steward T.A. Pickett, Stuart L. Pimm, and Rober J. Scholes.

The book is an invaluable new resource for scientists and managers involved with large, conserved ecosystems as well as for conservation practitioners and others with interests in adaptive management, the societal context of conservation, links between research and management in parks, and parks/academic partnerships.

From reader reviews:

Raymond Garza:

This The Kruger Experience: Ecology And Management Of Savanna Heterogeneity are usually reliable for you who want to be considered a successful person, why. The reason why of this The Kruger Experience: Ecology And Management Of Savanna Heterogeneity can be one of the great books you must have is actually giving you more than just simple looking at food but feed you with information that might be will shock your before knowledge. This book is usually handy, you can bring it everywhere you go and whenever your conditions throughout the e-book and printed kinds. Beside that this The Kruger Experience: Ecology And Management Of Savanna Heterogeneity giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we know it useful in your day exercise. So , let's have it and enjoy reading.

Earl Sanders:

Reading a e-book tends to be new life style in this era globalization. With reading through you can get a lot of information that may give you benefit in your life. Using book everyone in this world can share their idea. Publications can also inspire a lot of people. A great deal of author can inspire their reader with their story or their experience. Not only the story that share in the guides. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors on earth always try to improve their skill in writing, they also doing some investigation before they write to their book. One of them is this The Kruger Experience: Ecology And Management Of Savanna Heterogeneity.

Norman Ross:

Spent a free time and energy to be fun activity to do! A lot of people spent their leisure time with their family, or their very own friends. Usually they carrying out activity like watching television, going to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? Might be reading a book might be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to consider look for book, may be the publication untitled The Kruger Experience: Ecology And Management Of Savanna Heterogeneity can be very good book to read. May be it is usually best activity to you.

Jennifer Klein:

As a university student exactly feel bored in order to reading. If their teacher asked them to go to the library in order to make summary for some publication, they are complained. Just minor students that has reading's soul or real their interest. They just do what the educator want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that examining is not important, boring and can't

see colorful pictures on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this The Kruger Experience: Ecology And Management Of Savanna Heterogeneity can make you really feel more interested to read.
