From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence

Jan Holler, Vlasios Tsiatsis, Catherine Mulligan, Stefan Avesand, Stamatis Karnouskos, David Boyle

From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence

Jan Holler, Vlasios Tsiatsis, Catherine Mulligan, Stefan Avesand, Stamatis Karnouskos, David Boyle

From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence Jan Holler, Vlasios Tsiatsis, Catherine Mulligan, Stefan Avesand, Stamatis Karnouskos, David Boyle

This book outlines the background and overall vision for the Internet of Things (IoT) and Machine-to-Machine (M2M) communications and services, including major standards. Key technologies are described, and include everything from physical instrumentation of devices to the cloud infrastructures used to collect data. Also included is how to derive information and knowledge, and how to integrate it into enterprise processes, as well as system architectures and regulatory requirements. Real-world service use case studies provide the hands-on knowledge needed to successfully develop and implement M2M and IoT technologies sustainably and profitably. Finally, the future vision for M2M technologies is described, including prospective changes in relevant standards. This book is written by experts in the technology and business aspects of Machine-to-Machine and Internet of Things, and who have experience in implementing solutions.

- Standards included: ETSI M2M, IEEE 802.15.4, 3GPP (GPRS, 3G, 4G), Bluetooth Low Energy/Smart, IETF 6LoWPAN, IETF CoAP, IETF RPL, Power Line Communication, Open Geospatial Consortium (OGC) Sensor Web Enablement (SWE), ZigBee, 802.11, Broadband Forum TR-069, Open Mobile Alliance (OMA) Device Management (DM), ISA100.11a, WirelessHART, M-BUS, Wireless M-BUS, KNX, RFID, Object Management Group (OMG) Business Process Modelling Notation (BPMN)
- Key technologies for M2M and IoT covered: Embedded systems hardware and software, devices and gateways, capillary and M2M area networks, local and wide area networking, M2M Service Enablement, IoT data management and data warehousing, data analytics and big data, complex event processing and stream analytics, knowledge discovery and management, business process and enterprise integration, Software as a Service and cloud computing
- Combines both technical explanations together with design features of M2M/IoT and use cases. Together, these descriptions will assist you to develop solutions that will work in the real world
- Detailed description of the network architectures and technologies that form the basis of M2M and IoT
- Clear guidelines and examples of M2M and IoT use cases from real-world implementations such as Smart Grid, Smart Buildings, Smart Cities, Participatory Sensing, and Industrial Automation
- A description of the vision for M2M and its evolution towards IoT

From reader reviews:

Jeannette Coleman:

The particular book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence will bring that you the new experience of reading a new book. The author style to elucidate the idea is very unique. In the event you try to find new book to see, this book very ideal to you. The book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence is much recommended to you you just read. You can also get the e-book through the official web site, so you can quickly to read the book.

Gerald Magee:

With this era which is the greater individual or who has ability in doing something more are more precious than other. Do you want to become certainly one of it? It is just simple method to have that. What you have to do is just spending your time little but quite enough to get a look at some books. One of the books in the top list in your reading list is actually From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence. This book that is qualified as The Hungry Hillsides can get you closer in getting precious person. By looking right up and review this reserve you can get many advantages.

Dennis Haney:

As we know that book is essential thing to add our understanding for everything. By a publication we can know everything we really wish for. A book is a group of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This e-book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence was filled with regards to science. Spend your time to add your knowledge about your technology competence. Some people has diverse feel when they reading a book. If you know how big advantage of a book, you can feel enjoy to read a guide. In the modern era like now, many ways to get book that you just wanted.

Mark Garcia:

That e-book can make you to feel relax. This kind of book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence was colorful and of course has pictures on the website. As we know that book From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence has many kinds or category. Start from kids until teens. For example Naruto or Investigation company Conan you can read and think you are the character on there. So , not at all of book tend to be make you bored, any it offers you feel happy, fun and relax. Try to choose the best book to suit your needs and try to like reading which.
