Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) Laura Fernández Gallardo

This work addresses the evaluation of the human and the automatic speaker recognition performances under different channel distortions caused by bandwidth limitation, codecs, and electro-acoustic user interfaces, among other impairments. Its main contribution is the demonstration of the benefits of communication channels of extended bandwidth, together with an insight into how speaker-specific characteristics of speech are preserved through different transmissions. It provides sufficient motivation for considering speaker recognition as a criterion for the migration from narrowband to enhanced bandwidths, such as wideband and super-wideband.

From reader reviews:

Jackie Ballesteros:

Hey guys, do you really wants to finds a new book to study? May be the book with the headline Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) suitable to you? The particular book was written by famous writer in this era. Typically the book untitled Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services)is the one of several books that will everyone read now. That book was inspired a lot of people in the world. When you read this reserve you will enter the new way of measuring that you ever know before. The author explained their idea in the simple way, thus all of people can easily to comprehend the core of this book. This book will give you a lots of information about this world now. To help you see the represented of the world with this book.

Deborah Browning:

The publication with title Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) includes a lot of information that you can find out it. You can get a lot of benefit after read this book. That book exist new knowledge the information that exist in this reserve represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This particular book will bring you within new era of the the positive effect. You can read the e-book on the smart phone, so you can read that anywhere you want.

Pearl Young:

That reserve can make you to feel relax. This kind of book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) was colourful and of course has pictures on there. As we know that book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) has many kinds or variety. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book in your case and try to like reading which.

Mark Gallegos:

Guide is one of source of understanding. We can add our expertise from it. Not only for students but also native or citizen have to have book to know the update information of year for you to year. As we know those guides have many advantages. Beside we all add our knowledge, can also bring us to around the world. With the book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services) we can take more advantage. Don't you to be creative people? To get creative person must prefer to read a book. Only choose the best book that appropriate with your aim. Don't

be doubt to change your life with this book Human and Automatic Speaker Recognition over Telecommunication Channels (T-Labs Series in Telecommunication Services). You can more pleasing than now.
