**Bioinformatics: Genes, Proteins and Computers (Advanced Texts)** Christine Orengo, David Jones, Janet Thornton

The Advanced Text series is designed for students taking advanced-level courses, including upper-level undergraduates and graduate students. Titles in this series will also be invaluable to researchers new to a field, and to established researchers as a basic reference text.

Bioinformatics covers both the more traditional approaches to bioinformatics, including gene and protein sequence analysis and structure prediction, and more recent technologies such as datamining of transcriptomic and proteomic data to provide insights on cellular mechanisms and the causes of disease.
