**Landscape Genetics: Concepts, Methods, Applications** Niko Balkenhol, Samuel Cushman, Andrew Storfer, Lisette Waits

Despite the substantial interest in landscape genetics from the scientific community, learning about the concepts and methods underlying the field remains very challenging. The reason for this is the highly interdisciplinary nature of the field, which combines population genetics, landscape ecology, and spatial statistics. These fields have traditionally been treated separately in classes and textbooks, and very few scientists have received the interdisciplinary training necessary to efficiently teach or apply the diversity of techniques encompassed by landscape genetics. To address the current knowledge gap, this book provides the first in depth treatment of landscape genetics in a single volume. Specifically, this book delivers fundamental concepts and methods underlying the field, covering particularly important analytical methods in detail, and presenting empirical and theoretical applications of landscape genetics for a variety of environments and species. Consistent with the interdisciplinary nature of landscape genetics, the book combines an introductory, textbook like section with additional sections on advanced topics and applications that are more typical of edited volumes. The chapter topics and the expertise of the authors and the editorial team make the book a standard reference for anyone interested in landscape genetics. The book includes contributions from many of the leading researchers in landscape genetics. The group of scientists we have assembled has worked on several collaborative projects over the last years, including a large number of peer reviewed papers, several landscape genetics workshops at international conferences, and a distributed graduate seminar on landscape genetics. Based on the experiences gained during these collaborative teaching and research activities, the book includes chapters that synthesize fundamental concepts and methods underlying landscape genetics (Part 1), chapters on advanced topics that deserve a more in depth treatment (Part 2), and chapters illustrating the use of concepts and methods in empirical applications (Part 3). This structure ensures a high usefulness of the book for beginning landscape geneticists and experienced researchers alike, so that it has a broad target audience. At least one of the four co editors is involved in almost every chapter of the book, thereby ensuring a high consistency and coherency among chapters.

### **From reader reviews:**

#### **Shawn Croll:**

Here thing why that Landscape Genetics: Concepts, Methods, Applications are different and reliable to be yours. First of all examining a book is good but it really depends in the content of it which is the content is as delightful as food or not. Landscape Genetics: Concepts, Methods, Applications giving you information deeper and in different ways, you can find any book out there but there is no publication that similar with Landscape Genetics: Concepts, Methods, Applications. It gives you thrill reading journey, its open up your eyes about the thing in which happened in the world which is maybe can be happened around you. You can bring everywhere like in park, café, or even in your way home by train. For anyone who is having difficulties in bringing the published book maybe the form of Landscape Genetics: Concepts, Methods, Applications in e-book can be your choice.

#### **Amanda Bell:**

Now a day people who Living in the era just where everything reachable by talk with the internet and the resources included can be true or not require people to be aware of each details they get. How many people to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Looking at a book can help individuals out of this uncertainty Information particularly this Landscape Genetics: Concepts, Methods, Applications book because book offers you rich details and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it you may already know.

#### **Lois Hernandez:**

Does one one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Try and pick one book that you just dont know the inside because don't judge book by its handle may doesn't work the following is difficult job because you are frightened that the inside maybe not as fantastic as in the outside appear likes. Maybe you answer may be Landscape Genetics: Concepts, Methods, Applications why because the excellent cover that make you consider with regards to the content will not disappoint you actually. The inside or content is actually fantastic as the outside or cover. Your reading sixth sense will directly show you to pick up this book.

#### **Mary Ruch:**

A number of people said that they feel uninterested when they reading a book. They are directly felt this when they get a half elements of the book. You can choose the particular book Landscape Genetics: Concepts, Methods, Applications to make your own reading is interesting. Your personal skill of reading proficiency is developing when you like reading. Try to choose simple book to make you enjoy you just read it and mingle the opinion about book and looking at especially. It is to be first opinion for you to like to wide open a book and study it. Beside that the publication Landscape Genetics: Concepts, Methods, Applications can to be a newly purchased friend when you're feel alone and confuse in what must you're doing of that

time.
