New Studies on Former and Recent Landscape Changes in Africa: Palaeoecology of Africa 32

New Studies on Former and Recent Landscape Changes in Africa: Palaeoecology of Africa 32

Volume 32 (2013) of the internationally recognized and acclaimed yearbook series 'Palaeoecology of Africa' publishes 9 new interdisciplinary scientific papers on former and recent landscape evolution and on past environments of the African continent (e.g. climate change, vegetation dynamics and growing impact of humans on ecosystems). These papers expand horizons and interconnections to various types and methodologies of research on environmental dynamics from the Pliocene up to the present: review articles and regional case studies cover Nigeria, Cameroon, selected areas of the Congo basin, Kenya, Malawi, Namibia and South Africa. This volume also gives space to researchers from Africa to present their findings to a wider international audience.

Today, by growing awareness of the worldwide impact of Global Change, it has become obvious that aside of the northern and southern hemisphere Polar region also the environmental setting in Africa was subject to considerable changes over time. Natural shifts in climate at least since the Pliocene have caused repeated and strong modification in the area dynamics of ecosystems located in lower latitudes. By a variety of so-called 'proxies' – researched and applied by the different authors from numerous disciplines – an attempt is made to reconstruct the evolution of landscapes over space and time. Besides such spatio-temporal oscillations in forested and savanna areas of Africa this volume of 'Palaeoecology of Africa' also focuses on possible relationships between environmental change and human impact, also on the perception of this phenomenon of recent 'climate changes' by different stakeholders.

This book will be of interest to all concerned with low latitudes ecosystem changes and their respective interpretation in the framework of natural climate and vegetation change evidenced by a variety of methods that allow us to read and learn from 'proxy data' archives. Archaeologists, Palynologists, Palaeobotanist, Geographers, Geologists and Geomorphologists will find this edition equally useful for their work.

From reader reviews:

Jeffrey Barclay:

With other case, little individuals like to read book New Studies on Former and Recent Landscape Changes in Africa: Palaeoecology of Africa 32. You can choose the best book if you appreciate reading a book. As long as we know about how is important the book New Studies on Former and Recent Landscape Changes in Africa: Palaeoecology of Africa 32. You can add expertise and of course you can around the world by just a book. Absolutely right, due to the fact from book you can understand everything! From your country right up until foreign or abroad you may be known. About simple thing until wonderful thing you can know that. In this era, we can easily open a book or searching by internet system. It is called e-book. You can use it when you feel fed up to go to the library. Let's read.

Thomas Lemos:

People live in this new day time of lifestyle always try and must have the extra time or they will get large amount of stress from both everyday life and work. So , whenever we ask do people have free time, we will say absolutely sure. People is human not a robot. Then we inquire again, what kind of activity have you got when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the book you have read is usually New Studies on Former and Recent Landscape Changes in Africa: Palaeoecology of Africa 32.

Jeremy Hutchings:

The book untitled New Studies on Former and Recent Landscape Changes in Africa: Palaeoecology of Africa 32 contain a lot of information on the idea. The writer explains the woman idea with easy technique. The language is very easy to understand all the people, so do not really worry, you can easy to read it. The book was authored by famous author. The author will take you in the new period of time of literary works.
